

# Our Acknowledgment

## **The authors thank the collaborators from all neutron monitors stations, which data were taken for analysis:**

Alma-Ata, Athens, **Apatity**, **Baksan**, **Barenzburg**, Beijing, Bure, Calgary, **Cape Schmidt**, Climax, Dourbes, Erevan, Erevan3, ESOI, Fort Smith, Goose Bay, Guadalajara, Gulmarg, Haleakala, Hermanus, Inuvik, **Irkutsk**, **Irkutsk2**, **Irkutsk3**, JungfrauJoch-IGY, JungfrauJoch, Kergelen, Kiel, Kingston, Larc, Lomnicky Stit, **Magadan**, Mawson, **MCRL**, McMurdo, Mexico, **Mirny**, **Moscow**, Nain, Newark, **Norilsk**, **Novosibirsk**, Oulu, Peawanuck, Potchefstrom, Rome, Sanae, Santiago, South Pole, Putre, Tbilisi, Terra Adelie, Thule, Thailand, Tibet, YangBaJing, Santiago, **Tixie Bay**, Tsumeb, **Yakutsk**.

## **We thank also the collaborators from, unfortunately, closed CR stations:**

Alert, Alma-Ata-806, Ahmedabad, Buenos Aires, Chicago, Colledge, Dallas, Deep Rever, Durham, Goose Bay, Hafelekar, Heis, Hobart, Kiruna, Huancayo, Kiev, Kula, Leeds, Lindau, Makapuu, Mina Aguilar, Morioka, Mt.Norikura, Mt. Wellington, Mt. Washington, Munchen, Ottawa, Pic du Midi, Resolute, Rio de Janeiro, Seoul, Sulphur mt., Sverdlvsk, Swarthmore, Tokyo, Utreht, Victoria, Zugspitze.

## **The authors also thank the collaborators from muon detectors, whose data were used in the analysis:**

Muon detectors: Nagoya, Sao Martinho, Kuwait, Hobart, **Yakutsk**, Greifswald, Kiel, YangBaJing, **Novosibirsk**, Moscow-Mephi, **Moscow**, Mussala, Blagoevgrad, Bure, Adelaide, Buckland Park, Guangzhou, GRAND, Yerevan, Mawson, Belgrade, Santyago, Putre, Sierra Negra, Lodz, GRAPES-III;

Ionisation Camera: **Yakutsk** and Beijing; Carpet: IceTop, Baksan, Leonsito;

Underground: Norikura, Sakashita, Misato, Baksan BUST, Gran Sasso, IceCube.

## **The works are based on databases, whose data were used in the analysis:**

**nmdb**: “Real-Time Database for high-resolution Neutron Monitor measurements”, funded in 2008 by the European Union’s 7th Framework Programme as an e-Infrastructures project.

**Sites**: <http://www.nmdb.eu>, <http://www.nmdb.eu/nest/search.php> .

**mddb** “Muon detector data base” **Site**: <http://crsa.izmiran.ru/phpmyadmin> **user/pw=user/user**).

**iDB** “Database of Neutron Monitor Cosmic Ray Net”

**Sites**: <http://cr0.izmiran.ru/common/links.htm>.

**VarSITI** (Variability of the Sun and Its Terrestrial Impact ) <http://www.varsiti.org>.

Project “Database on the Forbush effects and interplanetary disturbances to study Solar-Terrestrial relationship“ <http://spaceweather.izmiran.ru/eng/dbs.html>

### **Experimental studies have supported by projects:**

Experimentally and methodologically research supported the project **UNU №85** "Russian national network of ground stations of cosmic rays" (USF – Unique Science Facilities). **Catalog** <http://www.ckp-rf.ru/usu/433536>, **Site** <http://cr.izmiran.ru/unu.html>.

### **Research supported by programs:**

By program **№ 3** BR of the Presidium RAS “Physics of Fundamental Interactions and Nuclear Technologies” (2018-2020), [Программы фундаментальных исследований президиума РАН № 3 "Физика фундаментальных взаимодействий и ядерные технологии"].

By program **№ 28** BR of the Presidium RAS “Space: the study of fundamental processes and their interactions” (2018-2020), [Программы фундаментальных исследований президиума РАН "Космос: исследование фундаментальных процессов и их взаимодействий"].

### **Research supported by grants:**

Russian Foundation for Basic Research, grant №17-02-00508a, Магнитосферные эффекты космических лучей: долговременные изменения и влияние геомагнитных возмущений [“Magnetospheres effects of cosmic rays: long-term changes and the effect of geomagnetic disturbances”].

Russian Foundation for Basic Research, grant №18-02-00451a, Новый метод исследования распределения космических лучей в гелиосфере по данным мировой сети мюонных телескопов [“New method of research of distribution of cosmic rays with the data of the world network of muon telescopes”].

Version and an example of acknowledgment:

#### **Acknowledgments**

This work was partially supported by the Program of the Presidium of RAS № 3 "Physics of Fundamental Interactions and Nuclear Technologies", Program № 28 “Space: the study of fundamental processes and their interactions”, RFBR grant № 17-02-00508a and и №18-02-00451a, experimentally and methodologically support the project UNU "Russian national network of ground stations of cosmic rays." We are grateful to all the staff of the World Network of cosmic ray stations <http://cr0.izmiran.ru/ThankYou>

Variant of acknowledgment in Russian:

Работа выполнена при частичной поддержке Программы фундаментальных исследований президиума РАН № 3 "Физика фундаментальных взаимодействий и ядерные технологии", Программы № 28 "Космос: исследование фундаментальных процессов и их взаимодействий". Работа частично поддержана в рамках гранта РФФИ № 17-02-00508a и №18-02-00451a. Работа выполнена с использованием оборудования УНУ “Сеть СКЛ”.

Мы также признательны всем сотрудникам сети станций космических лучей  
<http://cr0.izmiran.ru/ThankYou>
